PROFILE

I am a Front-End Developer.I excel in designing and maintaining responsive websites that offer a smooth user experience. My expertise lies in curiosity, crafting dynamic, engaging interfaces through writing clean and optimized code and utilizing cutting edge development tools and techniques. I am also a team player who thrives in collaborating with cross-functional teams to produce outstanding web applications. I am a versatile and accomplished developer with an impressive track record of developing innovative solutions.I am constantly ideating and conceptualizing innovative solutions that cater for users' needs. I am open to exploring new opportunities in startups and companies with scale.

WORK EXPERIENCE

Frontend Developer

Full-Time

Muzukuru Funeral Streaming **(October 2025-February 2026)**

- Developed and maintained responsive web applications using React.js and TypeScript
- Built reusable UI components with Material UI (MUI)
- Worked closely with backend teams to integrate RESTful APIs
- Utilized Git based workflows (branching, pull requests, code reviews) in team development

Web Content Manager

Internship

Love Your Food **(November 2023- August 2024)**

- Implemented on page SEO strategies that improved search engine visibility and organic traffic
- Managed and updated website content using WordPress CMS, ensuring accuracy, consistency and brand alignment
- Created, edited, published web pages, blog posts, landing pages and multimedia content

Software Engineer

Full-Time

Danler Tech **(June 2022- May 2023)**

- Worked in Agile/Scrum development environments
- Strengthened application security by implementing authentication flows and input validation
- Utilized Linux CLI tools for environment configuration, log inspection, process management and deployment support
- Participated in CI/CD pipeline workflows

Web Content Manager

Remote

Defcorp Private Limited **(July 2021- October 2021)**

- Implemented protected routes and role based access control within React applications
- Deployed and tested applications in Linux based staging environments
- Optimized frontend performance, reducing load times and improving Lighthouse scores
- Applied semantic HTML and accessibility standards to enhance SEO and usability
